# Indoor Air Quality Monitor/Logger Model C.A 1510

Monitor CO<sub>2</sub>, Temperature and Humidity around you for a healthy environment.

Used in Government Offices, Transportation, Workplaces, Private Residences, Educational Institutions and more.

# ► FEATURES

- Simultaneously monitors and displays CO<sub>2</sub>, Temperature and Humidity
- Stores up to 1 million measurements
- Case design facilitates both wall mount and stand-alone use
- Easy-to-read comfort indicators based on CO<sub>2</sub>, Temperature and Humidity
- Complies with the latest air quality standards
- Display can be turned off to conserve battery power
- Quick and simple data download via USB cable or wireless *Bluetooth*
- Supplied with AQR (Air Quality Report) software for data processing and report generation
- Optional on-site calibration kit and software available for adjusting to zero and 1700 ppm thresholds
- Available in two colors; white for laboratories, schools, medical, private residences and office environments and gray for industrial environments

## ► WHY MONITOR?

Outdoor air contains approximately 0.04% (400 ppm) of CO<sub>2</sub>. In indoor environments, human activity (breathing) can quickly raise this concentration to 1500 ppm.

We spend most of our time indoors, in public places (schools, hospitals, workplaces, private residences and planes, bus or train stations). For this reason, the levels of  $CO_2$  are an excellent indicator of ventilating efficiency.

Typical installation in an educational laboratory

**The Model C.A 1510** is compliant with the latest standards for measuring  $CO_2$  to assess ventilation system indoor air quality. It is also an accurate preliminary diagnostic indicator, because of its alarms set at 1000 ppm or 1700 ppm of  $CO_2$ .

## ► APPLICATIONS

Monitor Air Quality In: Check HVAC Ventilation System Efficiency In: Schools Hospitals Workplaces Private Residences Government Offices Plane, Bus or Train Stations And More!

The Right Source For Your Test & Measurement Needs

### **COMFORT & HEALTH**

Carbon dioxide is a colorless, odorless gas. Although it is non-toxic at normal levels, in high levels it may cause difficulty in concentrating, headaches and nausea. Temperature and humidity can also contribute to the development of mold which may release allergenic and irritant substances.

#### Two Color Backlit Screen:

The Model C.A 1510 measures and displays three parameters simultaneously (CO<sub>2</sub>, temperature and relative humidity). An integrated help and a visual aid is provided to assist in interpretation of the comfort level indicators.

The display blinks with red backlighting when any of the measured parameters exceeds the user-selected threshold. The red backlighting is solid when levels exceed upper limit values.

Normal Level

High Level

## ► MULTIPLE MOUNTING SYSTEMS

Model C.A 1510 offers a variety of mounting options.

Wall Mount

Hole on top for hanging options

Desk Stand

Embedded magnets on backside for mounting on metal surfaces

8715 Mesa Point Terrace San Diego, CA 92154 Toll Free: 1.866.363.6634 Tel: 1.619.429.4545 Fax: 1.619.374.7012 Email: sales@calright.com http://www.calright.com

### ► SPECIFICATIONS

MODEL	C.A 1510				
MEASUREMENT					
CO <sub>2</sub> Measurement					
Measuring Principle	Non-dispersive infrared (NDIR) technology				
Type of Sensor	Double-beam infrared cell sensor				
Measurement Range	0 to 5000 ppm				
Accuracy	$\pm 50$ ppm $\pm 3\%$ of value measured				
Response time to 63%	<200 seconds				
Resolution	1 ppm				
Temperature Measurement					
Type of Sensor	CMOS				
Units	°F or °C				
Measurement Range	14° to +140°F (-10° to +60°C)				
Accuracy	±0.9°F (0.5°C)				
Resolution	0.1°F (0.1°C)				
Humidity Measurement					
Type of Sensor	Capacitive				
Measurement Range	5 to 95% RH				
Accuracy	±2% RH				
Resolution	0.1% RH				
GENERAL					
Recording Interval	Programmable from 1 minute to 2 hours				
Storage	Up to 1 million measurements				
Alarm	Yes				
Backlighting, Display Hold Function & Min-Max	Yes				
Automatic Power-Off	Yes (in portable mode only)				
Operating Range	Temperature: 14° to +140°F (-10° to +60°C) Humidity: 5 to 95% RH)				
Dimensions	4.92 x 2.58 x 1.26" (125 x 65.5 x 32 mm)				
Weight	6.70 oz (190g with batteries)				
Protection	IP40				
Compliance	IEC 61010-1, 50V CAT II – IEC 61326-1				
Power Supply	Alkaline batteries: 2 AA or rechargeable battery connection to 120V 60Hz line/ USB to wall adapter				
Communication	Bluetooth Class 2 wireless communication / USB link; the product is then recognized as a USB key for easy file transfer				
Mounting	Embedded magnets on backside, tear drop wall hook, optional padlockable wall mount (padlock is not included) and optional desktop stand				
Functions of the AQR (Air Quality Report) software, for PC, supplied with model	Graphic representation or as table of values, data export, real-time mode calculation of the confinement index with selection of presence periods & report generation				

The Right Source For Your Test & Measurement Needs

### OPERATIONAL MODES

#### **Portable:**

Start up mode is the most responsive, taking CO<sub>2</sub> readings every 15 seconds and the temperature and humidity readings every 2 seconds. Ideal for quickly checking air quality in multiple rooms by walking from room to room, taking measurements.

#### 1D Mode:

Monitors CO<sub>2</sub> levels every 60 seconds and the temperature and humidity every 2 seconds. Provides a visual indication of comfort level based on CO<sub>2</sub> levels. Display blinks with red backlighting when CO<sub>2</sub> level exceeds 1000 ppm. Audible alarm sounds, if level exceeds alarm threshold.

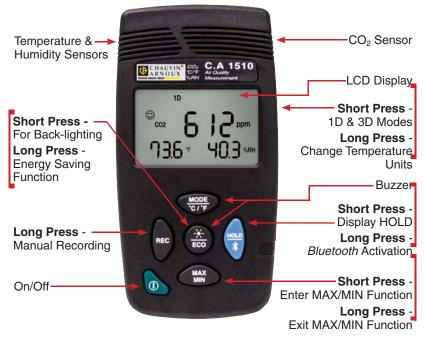

#### 3D Mode:

Monitors  $CO_2$  levels every 60 seconds and the temperature and humidity every 2 seconds. Provides a visual indication of comfort level based on all three measurements. Display blinks with red backlighting when  $CO_2$ , temperature or humidity levels exceed threshold. Audible alarm sounds, if level exceeds alarm threshold.

#### ECO (Energy Saving) Mode:

Used for long term monitoring. Monitors CO<sub>2</sub> levels every 10 minutes and the temperature and humidity every 5 seconds. Backlighting and alarms are deactivated. The C.A 1510 goes into sleep mode between user programmable hours to conserve battery life. Times can be programmed through the AQR Software.

### ► FUNCTIONS

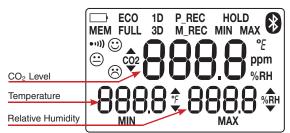

#### P\_REC (Programmed Recording):

The start and end date and times can be programmed, as well as the storage rate, using the AQR (Air Quality Report) software provided or by using the available Android App. Additionally, the display can be locked (turned off during recording) or unlocked (displays measurements and record mode).

#### M\_REC (Manual Recording):

Recording sessions can be started and stopped by pressing the REC button on the front panel. CO<sub>2</sub>, temperature and humidity are recorded at the rates associated with the operational mode selected.

#### DISPLAY FUNCTIONS AND INDICATORS

DISPLAY INDICATORS				
MEM_FULL	Memory Full			
1D	Monitor CO <sub>2</sub> level			
3D	Monitor CO <sub>2</sub> , temperature and humidity comford zone thresholds			
MAX	Maximum value			
MIN	Minimum value			
ECO	Energy saving mode			
P_REC	Programmed recording			
M_REC	Manual recording			
HOLD	Display hold			
MAX MIN	Maximum and minimum value detection			
ppm	Parts per million concentration			
•1))	Buzzer active			
8	Bluetooth active			
<b>D</b>	Blinking - batteries low Steady - external power supply indicator			
	High threshold triggered			
V	Low threshold triggered			
☺ ☺ ⊗	B Indication of air quality and temperature/humidity comfort zone

# **ENVIRONMENTAL TESTER** CO<sub>2</sub> - Temperature - Humidity

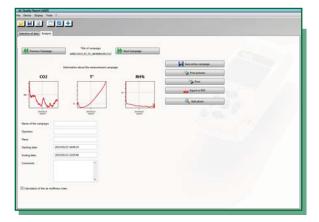

### ► Communications

#### **Two communication modes are available**: USB or *Bluetooth*. They are used to configure recording, remote display on a PC or Android<sup>™</sup> tablet and data display of trend graphs or tabular listings. They can also be used to export the data into Excel, to calculate the confinement index with selection of periods aligned to when people are present and to generate reports.
