

# INDIGO SMART PROBES

## HUMIDITY AND TEMPERATURE PROBES

Indigo-compatible humidity and temperature probes are based on the space-proof Vaisala HUMICAP® technology, the world's first thin-film capacitive humidity sensor. Vaisala HUMICAP™ sensors guarantee quality and reliability, with a reputation for accuracy, excellent long-term stability, and negligible hysteresis.

Indigo-compatible humidity probes are suitable for a wide range of applications from industrial processes to life science and building automation. They provide a comprehensive list of output parameters, including relative humidity, temperature, dew point temperature, wet bulb temperature, absolute humidity, mixing ratio, water vapor pressure, and enthalpy. All probes are supplied with RS-485 non-isolated Modbus RTU output.

# INDIGO SMART PROBES

## DEW POINT PROBES

Indigo-compatible dew point probes feature Vaisala's trusted DRYCAP® technology, specifically designed for humidity measurement in dry environments. The DRYCAP® sensor is particularly renowned for its reliable performance in hot and very dry environments. These probes excel in a range of applications, from drying processes to compressed air, dry chambers, and industrial ovens. All probes are supplied with RS-485 non-isolated Modbus RTU output.

## CARBON DIOXIDE (CO<sub>2</sub>) PROBES

Indigo-compatible carbon dioxide (CO<sub>2</sub>) probes are based on Vaisala's unique CARBOCAP® technology that provides exceptional stability. They are ideal for applications such as incubators, greenhouses, food storage and transport, animal shelters, and demand-controlled ventilation. They can even be installed outdoors.

GMP251	GMP252

## VAPORIZED HYDROGEN PEROXIDE (H<sub>2</sub>O<sub>2</sub>) PROBES

Indigo-compatible vaporized hydrogen peroxide (H<sub>2</sub>O<sub>2</sub>) probes feature Vaisala's unique PEROXCAP® technology, which enables accurate and repeatable measurement of vaporized H<sub>2</sub>O<sub>2</sub>, relative humidity / saturation (%RH / %RS), and temperature during bio-decontamination with a single probe.

	<b>HPP271</b> H <sub>2</sub> O <sub>2</sub> vapor concentration	<b>HPP272</b> H <sub>2</sub> O <sub>2</sub> vapor concentration, relative saturation, humidity, and temperature

## MOISTURE-IN-OIL PROBE

Indigo-compatible probe MMP8 incorporates the Vaisala HUMICAP 180L2 sensor, which is optimized for moisture in oil applications. The probe is suitable for demanding moisture measurement in a range of oils such as transformer, hydraulic, and lubrication oils and includes a CIGRE recommended traceable calibration certificate.

	<b>MMP8</b>
<b>MEASUREMENT RANGE</b>	Water activity 0 ... 1 a <sub>w</sub> Temperature -40 ... +180 °C (-40 ... +356 °F)
<b>T90 RESPONSE TIME</b>	10 min
<b>ACCURACY</b>	Water activity ±0.01 a <sub>w</sub> (±1 %RS) Water concentration in oil 10 % of the reading Temperature ±0.2 °C (0.36 °F) at +20 °C (+68 °F)
<b>OPERATING ENVIRONMENT TEMPERATURE</b>	probe head -40 ... +180 °C (-40 ... +356 °F) probe body -40 ... +80 °C (-40 ... +176 °F)

## HOST DEVICES FOR INDIGO SMART PROBES

Vaisala Indigo transmitters offer many features that complement Indigo-compatible smart probes. They enable real-time data visualization and access to probe configurations. They also offer additional connectivity, supply voltage, and wiring options compared to using a stand-alone smart probe.

## Barometric pressure measurement

The Indigo520 transmitter with the barometric pressure measurement module combined with one or two of the Indigo-compatible humidity and temperature measurement probes is a unique combination of a meteorological-grade barometer in a single industrial device. Measure three parameters simultaneously: barometric pressure, humidity and temperature. The device incorporates Vaisala's proprietary, space-proof HUMICAP® and BAROCAP® technologies.

## VAISALA INSIGHT PC SOFTWARE

Vaisala Insight PC Software provides quick access to the configuration options and calibration data of Indigo-compatible smart probes. Probes can be detached from the process and connected to a PC with a USB cable to access Insight PC software. The software, which features an intuitive graphical user interface, also allows probe field calibration and adjustments. It also enables easy testing and evaluation – the 48-hour data logging functionality allows data to be recorded from up to six devices simultaneously, with easy export to an Excel-readable format.

- Configure devices to fit perfectly to your needs
- Calibrate and adjust probes on-site
- Run tests and analyze results with 48h data logging functionality

[Download Insight PC software](#) for free.
